JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

CONTENTS

IWASES III — Proceedings of the Third International Workshop on Auger Spectroscopy and Electronic Structure, Liverpool, UK, 4–8 September 1994

Preface xi

Committees, Exhibitors and Sponsors xii

Participants xiii

Adsorbates, Surfaces and Interfaces

Autoionization as a tool for studying adsorbed atoms and molecules*
N. Mårtensson and A. Nilsson (Uppsala, Sweden) 1

An adiabatic model of chemisorbed molecules: electron spectroscopy and excited-state potential-energy surfaces*
D.R. Jennison, E.B. Stechel and A.R. Burns (Albuquerque, NM, USA) 9

The dynamics of core hole excitation and decay in adsorbed and condensed molecules on solid surfaces*
D. Menzel (Garching near Munich, Germany) 19

Valence excitation and ESD of Cl^+ ions from the Cl/Si(100) interface
Q. Guo, D. Sterratt and E.M. Williams (Liverpool, UK) 31

Angle resolved autoionization spectra of adsorbates on metal oxide surfaces
J. Klinkmann, D. Cappus and H.-J. Freund (Bochum, Germany) 37

Changes in oxygen Auger spectra induced by potassium in the Ni(100)–O/K coadsorption system
P. Finetti, S.J. Murray, T.K. Johal and R. McGrath (Liverpool, UK) 43

Sensitivity analysis of dipole layers at semiconductor interfaces*
S.P. Wilks and R.H. Williams (Cardiff, Wales, UK) 49

An AES study of the Si–Gd interface electronic structure
T. Vdovenkova (Kiev, Ukraine) 55

Surface density of states of Sb/GaAs(110) and H:GaAs(110) by metastable deexcitation spectroscopy
L. Pasquali, A. Plesanovas, A. Ruocco, A.C. Tarabini, S. Nannarone (Modena, Italy), I. Abbati (Milan, Italy), M. Canepa, L. Mattera and S. Terreni (Genoa, Italy) 59

A photoemission study of the (2 × 2) reconstructions of GaAs{111} surfaces
J.M.C. Thornton, P. Weightman (Liverpool, UK), D.A. Woolf and C.J. Dunscombe (Cardiff, Wales, UK) 65

An experimental study of the electronic structure of C_{60} films grown at the Ag(110) surface
J. Kovač, G. Scarel, O. Sakho and M. Sancrotti (Trieste, Italy) 71

Semiconductors and Compounds

On Auger *CVV* line shapes from covalently bonded solids
M. Cini, A. Pernaselci and E. Paparazzo (Rome, Italy) 77

Band gap, excitons and Coulomb interactions of solid C_{60}
R.W. Lof, M.A. van Veenendaal, H.T. Jonkman and G.A. Sawatzky (Groningen, The Netherlands) 83

Electronic properties of ion implanted hydrogenated amorphous carbon
G. Currò, G. Mondio, F. Neri (S. Agata di Messina, Italy), G. Foti and G. Compagnini (Catania, Italy) 89

The use of the Auger parameter in the characterisation of some silicon compounds
L. Lozzi, M. Passacantando, P. Picozzi and S. Santucci (Coppito, AQ, Italy) 97

The pecularities of the electronic structure of La_2CuO_4 and $YBa_2Cu_3O_{7-\delta}$ compounds
A.N. Timoshevskii, A.E. Krasovskii and V.S. Melnikov (Kiev, Ukraine) 101

$L_3M_{4,5}M_{4,5}$ spectator Auger processes in 4d transition metal compounds
K. Yoshii, Y. Baba and T.A. Sasaki (Ibaraki-ken, Japan) 107

$L_{23}MM$ resonant Auger spectra of Mn in $KMnF_3$
A. Kikas, A. Maiste, A. Saar and M. Elango (Tartu, Estonia) 113

*Invited paper.

MNN resonant Auger spectra of Ce in $CeCl_3$
A. Maiste, M. Elango, A. Kikas, R. Ruus and A. Saar (Tartu, Estonia) 119
Extended abstract: electron correlation in CaF_2 studied in threshold excited soft X-ray fluorescence
J.-E. Rubensson (Jülich, Germany), S. Eisebitt (Vancouver, BC, Canada), M. Nicodemus, T. Böske and W. Eberhardt (Jülich, Germany) 125
Auger and photoelectron spectra of K^+ in solids at resonant $2p^6$ to $2p^53d$ excitation
M. Elango, A. Ausmees, A. Kikas, A. Maiste, E. Nõmmiste and A. Saar (Tartu, Estonia) 127

Metals and Alloys

Auger and autoionisation spectra of rare earths*
J.A.D. Matthew (Heslington, York, UK) 133
The role of off-site interactions in the theory of *CVV* Auger spectra in solids*
C. Verdozzi (Liverpool, UK) 141
One-, two- and three-body features in Auger *CVV* spectra
M. Cini (Rome, Italy) and V. Drchal (Prague, Czech Republic) 151
Core-valence (*KLV*, *KVV*, *LVV*) Auger and high resolution valence band XPS spectra of aluminium: a comparison with the results of cluster MO calculations
Zs. Kovács, L. Kövér, D. Varga (Debrecen, Hungary), P. Weightman (Liverpool, UK), J. Pálinkás (Debrecen, Hungary) and H. Adachi (Kyoto, Japan) 157
Influence of electron correlations on Auger spectra of solids with partially filled bands
M. Potthoff (Berlin, Germany), J. Braun, G. Borstel (Osnabrück, Germany) and W. Nolting (Berlin, Germany) 163
Angle resolved Auger electron spectroscopy: an alternate tool for identifying electronic excitation processes in solids
D.E. Ramaker, R.A. Fry and Y.U. Idzerda (Washington, DC, USA) 169
Calculated Auger transition probabilities: from free atom to solids
Yu.N. Kucherenko (Kiev, Ukraine) 181
Spin resolved Auger electron spectroscopy after photoexcitation with circularly polarized radiation from the BESSY crossed undulator
N. Müller, R. David, G. Snell, R. Kuntze, M. Drescher, N. Böwering, P. Stoppmanns, S.-W. Yu, U. Heinzmann (Bielefeld, Germany), J. Viefhaus, U. Hergenhahn and U. Becker (Berlin, Germany) 187
Does the Friedel–Anderson model give a good account of the d levels of dilute transition metals in magnesium and aluminium alloys?
P.T. Andrews, S.C. Millar (Liverpool, UK), G. Cubiotti (S. Agata di Messina, Italy), Yu.N. Kucherenko, A.N. Yaresko, V.N. Antonov (Kiev, Ukraine), R.I.R. Blyth and P. Weightman (Liverpool, UK) 195
Core hole screening and electronic structure information
G.G. Kleiman, R. Landers and S.G.C. de Castro (São Paulo, Brazil) 199
The localisation of 3d hole states in Fe and FeAl studied by Auger vacancy satellite spectroscopy
P. Unsworth, N. Brooks, J.M.C. Thornton (Liverpool, UK), M. Sancrotti (Trieste, Italy), S. D'Addato (Modena, Italy), L. Duó (Milan, Italy), P.T. Andrews and P. Weightman (Liverpool, UK) 205
High energy Auger satellites of the 4d transition metals
R. Landers, G.G. Kleiman, and S.G.C. de Castro (São Paulo, Brazil) 211
Copper L_3-$M_{4,5}M_{4,5}$ Auger and Auger satellite structures in polycrystalline $Cu_{50}Pd_{50}$ alloy
P. Unsworth, N. Brooks, J.M.C. Thornton (Liverpool, UK), M. Sancrotti (Trieste, Italy), S. D'Addato (Modena, Italy), L. Duó (Milan, Italy), P.T. Andrews and P. Weightman (Liverpool, UK) 217
EXFAS studies on the thermal behaviour of copper surface
L. Lozzi, M. Passacantando, P. Picozzi, S. Santucci (Coppito, AQ, Italy) and M. De Crescenzi (Camerino, MC, Italy) 223
Two-particle spectra of heavy fermion systems
P. Valášek, W. von der Linden and V. Dose (Garching near Munich, Germany) 229

Atomic and Molecular Processes

Resonant Auger spectroscopy of atoms and molecules*
H. Aksela (Oulu, Finland) 235
Angular distribution in resonant Auger decay of atoms and molecules
U. Hergenhahn and U. Becker (Berlin, Germany) 243
Angular distribution in the 1s → 3p coherently excited resonant *KLL* Auger spectrum in neon
S. Fritzsche (Göteborg, Sweden) 249
Extra-atomic relaxation energy calculations using an extended potential model
R.J. Cole (Liverpool, UK), J.A.D. Matthew (Heslington, York, UK) and P. Weightman (Liverpool, UK) 255

Potential parameters for analysis of chemical shifts for the elements lithium to argon
M.D. Jackson, R.J. Cole, N.J. Brooks and P. Weightman (Liverpool, UK) 261
Comparison of linewidths for resonant Auger and normal Auger spectra
F. Combet Farnoux (Orsay Cedex, France) 267

Instrumentation, Techniques and Methodology

Soft X-ray fluorescence spectroscopy using tunable synchrotron radiation*
J. Nordgren and N. Wassdahl (Uppsala, Sweden) 273
Photoemission spectromicroscopy in materials science and in neurobiology*
G. Margaritondo (Lausanne, Switzerland), G. De Stasio (Frascati, Rome, Italy) and C. Coluzza (Lausanne, Switzerland) ... 281
Auger photoelectron coincidence spectroscopy (APECS): a tool for understanding Auger emission from solids*
S.M. Thurgate and C.P. Lund (Perth, WA, Australia) 289
Auger lineshape modulation by scattering-interference of primary electrons
A. di Bona and S. Valeri (Modena, Italy) 299
Auger line shape measurements using positron annihilation induced Auger electron spectroscopy
A.H. Weiss, S. Yang, H.Q. Zhou, E. Jung and S. Wheeler (Arlington, TX, USA) 305
Methods and applications for the deconvolution of (Auger) electron spectroscopy data
H. Busse, K. Wandelt and G.R. Castro (Bonn, Germany) 311
High-resolution electron energy analyser for angle-resolved spectroscopy
S.N. Davydov, Yu.A. Kudinov, Yu.K. Golikov and V.V. Korablev (St Petersburg, Russia) 317
Cone electrostatic energy analyser, used for concurrent energy-resolved and angle-resolved measurements
N.K. Krasnova, S.N. Davydov, Yu.K. Golikov, V.V. Korablev and Yu.A. Kudinov (St Petersburg, Russia) 323
Recombination spectra of some solid rare earths excited by monochromatic and non-monochromatic synchrotron radiation
O.-P. Sairanen, S. Aksela and A. Kivimäki (Oulu, Finland) 327
